

Environmental product declaration, EPD

2014-06-12

Extracon is a consulting company with engagement in environmental area as well as in area of social responsibility. Extracon started in year 2008. The owner Göran Brohammer has been involved in environmental work since beginning of 1980-ties.

The ISO 14025 standard gives a framework for the establishment of environmental declarations systems. It's not detailed enough to be used as it is in certification purposes. One such system though, the EPD system, is an application of ISO 14025, a certifiable norm for environmental declarations based on LCA. The normative document is called "General program instructions" or short GPI and could be downloaded (for free) at www.environdec.com. The norm describes some fundamental issues: How LCA shall be done, the PCR / PSR – product category rules / product specific requirements, the PCC - process certification clarification and climate declarations etc.

At Extracon we do perform such jobs and we have done it as a consultant job as well as certification activities.
