

# Eco efficiency assessment, ISO14045

2014-06-12

Extracon is a consulting company with engagement in environmental area as well as in area of social responsibility. Extracon started in year 2008. The owner Göran Brohammer has been involved in environmental work since beginning of 1980-ties.

In year 2012, a new standard ISO14045 was released concerning making eco-efficiency assessment of product systems. Its a add-on to ordinary LCA work (see other fact sheet), where other aspects as function, economy etc. besides environment also is considered in parallel, and where the result is balanced as a eco efficiency result. These other aspects shall as in case for environment consider a life cycle perspective. The result shall be quantified and allow for comparisons between product systems.

At Extracon we do perform these studies as well as act as reviewer of such jobs.
