

EcoDesign

2014-06-12

Extracon is a consulting company with engagement in environmental area as well as in area of social responsibility. Extracon started in year 2008. The owner Göran Brohammer has been involved in environmental work since beginning of 1980-ties.

Environmentally adapted product development or EcoDesign is often demanded but not that often practiced. There are some legislation (ex. EuP directive), and some norms (ex. ISO14006), but in general not that much guideline is given in a sustainable perspective. In September 2014, there will be released a guideline "EcoDesign roadmap", giving guideline based on 10 Golden Principles that cover subjects as assembly for disassembly as well as human rights and toxicity among others. It's a practical guideline made for education in universities as well as inspiring guidelines for product developers and decision makers within industry. The guideline has been written by professor Conrad Luttrupp and Msc Göran Brohammer and released by publisher Studentlitteratur AB.

At Extracon we can support companies in trainings as well as in application projects, also together with professor Conrad Luttrupp when suitable.
